 - Scripting API Implementation Validation
 - Security Validation
 - of a specific WoT implementation
 - of the specification (“security review”)
 - Thing Description
 - Scripting API
 - Related services
 - Thing Directory
 - Discovery
 - Provisioning

Discussion

- Current status
- What needs to be done
- What do we do next
 - And who does it...

Current Status

- TD Playground
- Implementation test cases:
 - node-wot

Context: TD Validation

Context: Implementation Validation

Context: Specification Review

What we need to do and who does it

- By the next plugfest...
- Before release...
- To build the ecosystem...
